

Manual

Once the dependencies have been installed, the program can be executed using one of following commands:

```
python lab2-v1.py
```

```
python3 lab2-v1.py
```

The following variables can be altered to experiment with the code:

```
num_repeats = 5
```

```
train_frac = 0.7
```

```
random_seed = 42
```

The values fixed are in order for the results to be reproduced.
